

Week#15 Lab

Arrays

CSC 111

Evaluation Question

Write a program that:

- Prompts the user to enter the size of the array.
- Reads an array of Strings.
- Calls the method `filterLongNames` described below and passes the read array.
- Prints the returned array.

```
public static String[] filterLongNames(String[] arr)
```

This method takes a String array **arr** as a parameter. Counts names with length grater than 5. Creates a new array containing only the Strings with a length greater than 5. It finally returns the new array.

Sample run:

Enter the number of names: 5	Name(s) longer than 5 characters:
Enter the names:	Dawood
Ali	
Badr	
Faris	
Dawood	
Ilyas
