

Week#6 Lab

If statement Boolean expression

CSC 111

Evaluation Question (Wednesday)

Q) Often, we come across needs to validate the user's inputs, e.g., marks shall be between 0 and 100. Write a program in Java, named **Numbers**, for validation of numbers, it should ask user for an integer input between 0-10 or 90-100. The program shall read the input as int and print a correct input or invalid input.

Sample Run 1:

Enter a number between 0-10 or 90-100: 50

50 is an invalid input

Sample Run 2:

Enter a number between 0-10 or 90-100: 95

95 is a correct input
