Evaluation Question

Write a program that prompts the user to enter the name of the day. If the day's name is incorrect, terminate the program. If the day is "Friday" or "Saturday", print "Weekend!". Otherwise, print the number of days until the next weekend.

Sample run 1:

Enter a day's name: **Monday**
4 days until the next weekend.

Sample run 2:

Enter a number: **Saturday**
Weekend!

Sample run 3:

Enter a number: **Holiday**
Incorrect day.
